TECHNICAL SKILLS

Data Analytics & Tools: SQL, Python, Tableau, Excel, SQLite, Power Query, GitHub

Analytics: Data Cleaning, Data Validation, Data Reconciliation, Data Quality, Data Visualization, KPI Reporting, Trend Analysis, Root Cause Analysis

Excel: PivotTables, XLOOKUP, formulas, charts, data reconciliation

EDUCATION

Southern New Hampshire University | B.S. Computer Science, Cum Laude

July 2026

Relevant Coursework: SQL, Data Analytics, Applied Statistics, Data Quality & Cleaning, Systems Analysis

GPA: 3.5/4.0

Graduated Cum Laude with a Bachelor of Science in Computer Science while working full time, demonstrating strong time management, discipline, and commitment to professional growth.

PROFESSIONAL EXPERIENCE

Walmart Distribution Center | Shipping Operations Associate

June 2019 – Present

- Maintain and validate trailer weight, truck number, seal number, and shipment data across Excel and warehouse systems to support accurate outbound records.
- Reconcile shipment information across HMI, yard management, and operational systems to identify discrepancies and verify freight movement.
- Perform data quality checks on outbound shipment information and work with loaders and operations leadership to resolve inconsistencies.
- Coordinate daily shipping activity across 12–16 loaders responsible for approximately 100+ outbound trailers in a fast-paced distribution environment.

Sportec Solutions | Soccer Live Event Data Operator

2026 – Present

- Capture and enter live match data for professional soccer competitions, including goals, shots, and other defined events, using Sportec's live input system.
- Evaluate and classify match events using standardized definitions, then validate and correct entries to maintain accurate, timely datasets for MLS competitions.
- Coordinate with another data operator during live matches to maintain speed, accuracy, and complete event coverage.

PROJECTS

Supply Chain Delivery Performance Analysis | SQL, Python, SQLite, Tableau, GitHub

- Analyzed 180,000+ global shipment records using SQL and SQLite to evaluate delivery performance across shipping modes and regions.
- Identified First Class as the highest-risk shipping mode with a 95.3% late-delivery rate, compared with 38.1% for Standard Class, helping isolate a major driver of delivery performance issues.
- Used Python to validate analytical results, investigate data patterns, and identify operational issues, then used Tableau to communicate findings through visualizations.

Clinical Trial Feasibility Analysis | SQL, Python, SQLite, Tableau

- Built a Type 2 Diabetes patient cohort using SQL and SQLite and analyzed more than \$2.4 million in healthcare claims to identify utilization trends and cost drivers.
- Used SQL and Python to evaluate encounters, medications, comorbidities, and claim costs, then created Tableau dashboards to communicate findings.
